Luma Technologies

LED Annunciators

- Deadfront, Sunlight Readable Lighting
- Matches Linear Dimming Curve of Incandescent Lamps
- Standard “Grimes Style” or Low Profile configurations
- Life of the Aircraft Reliability
- Conventional or NVIS compatible applications

Luma's new 3000 Series line of LED annunciators offer stunning performance with a host of available packaging options including a replacement “Grimes Style” legacy design with traditional screw terminals or thru-hole solder-pins, or our low-profile version with panel depths as low as .700”.

All utilize a common core electronics module that provides built-in power conditioning and surge protection while matching the dimming curve of surrounding incandescent devices.
