

LT-4000 Series

TRANSAS
Luma Technologies

Integrated LED Displays & Caution/Warning Systems

- Low Temperature, High-Reliability LED's
- Deadfront, Sunlight Readable Lighting with full Dim & Test capabilities (Remote or Automatic)
- Integrated "One Box" Solution for reduced weight & ease of installation
- Full-featured with master caution alerts and reset capabilities
- Additional channels for remote annunciators. Ideal solution for tandem cockpits
- Conventional or NVIS compatible lighting

Luma Technologies' 4000 Series Integrated LED Display Systems offer unsurpassed performance in a low profile, light weight package. The 4000 Series replaces traditional ganged and uneven cap assemblies with an attractive one-piece legend surface that's an ideal compliment to today's glass cockpit installations. Each design has built-in proven power conditioning and surge protection and is thoroughly tested to DO-160E standards offering life of the aircraft reliability.
