

LT-4500 Series

LED Annunciator Panels for King Air 200, 300, 350/350i & 1900D Aircraft

- LED Reliability and Low Temperature operation
- Superior Lighting Performance with true Sunlight Readability
- Deadfront single piece Legend Plate compliments modern-day Glass Cockpit Displays
- Drop-in Plug and Play Functionality
- Five Year Warranty
- STC Pending - now taking orders for December availability

Luma Technologies' LT-4500 Series Integrated LED Display System offers unsurpassed Reliability and Lighting Performance for the larger King Air & 1900D platforms. The 4500 Series replaces the traditional banks of ganged and uneven incandescent cap assemblies with an attractive one-piece legend surface that's an ideal compliment to today's glass cockpit installations.

Add the low temperature operation and long life offered by the unit's surface mount LED's and you can't go wrong. Each design has built-in power conditioning and surge protection and has been thoroughly tested to DO-160E standards offering life of the aircraft reliability.
